

Press Note

The Himachal Pradesh Public Service Commission has been conferred with E-Governance Award in the Project Category-‘State Government 20th SIG e-Governance Awards-2022’ by Computer Society of India for successfully implementing HPPSC–ICT Project..

H.P. Public Service Commission in collaboration with NIC Himachal Pradesh has developed and implemented PSC Software successfully under ICT Project which has many candidates’ and Govt. Departments’ friendly features. One such feature is ‘One time Registration’ for the use of aspiring Candidates which allows them to register by creating their profiles once on the portal of the Commission and update profiles from time to time, enabling them to apply against the advertised posts as soon as the advertisements are issued. Once registered in the OTR, the candidates can apply against the advertised posts with a few clicks which not only save their valuable time but also avoid traffic congestion on the Portal at the last moments. Candidates can track the status of Fees paid, Applications, Admit cards, Interview Call Letter and Results on the dashboard of their OTR account. In addition to this, requisitions from various Govt. Departments and recommendations of the candidates are sent online through this software and department can also track the status of their requisitions. This software has not only reduced recruitment processing time but also brought transparency, paperless solution and is delivering quality e-Governance Services to the stake holders.
